

FIME Japan

Company Description

FIME is offering IC Testing Solutions for smartcards, RFID and NFC. Solutions for payment, eID, telecom, logistics and transportation markets.

FIME is a pioneer in smart card testing services in the 1990s, FIME is today well advanced in the field of contactless testing. With over 100 employees on three continents, FIME provides a solution adapted to your local needs.

FIME is an international company, part of Group Silicomp (headquarters in France, 1,000 employees, Turnover USD 100 M, with subsidiaries in France, USA, India, Singapore, Taiwan). FIME, founded in 1962, is an independent service company with leading test centres based in Caen (France), Taipei (Taiwan) and Montreal (Canada), specialized in certification tests for IC-cards and terminals (ISO 7816, EMV, ISO 14443). These ISO 17025 certified laboratories operate mainly in the electronic payment system, transportation, identity and health sectors, both in the IC "contact" and "contactless" fields (RFID). The FIME laboratories, leaders in EMV tests, are today notably accredited by MasterCard Worldwide, Visa International and JCB International.

FIME Japan inherited the culture and working systems from its French parentgroup. FIME Japan has been steadily growing since its establish in 2013 and now is eager to welcome more talents to joint the team to create an even brighter future.
