

Occidental Chemical Asia Ltd.

Company Description

Occidental Chemical Asia Ltd. is the North Asia regional office of Occidental Chemical Corp. (Oxychem) , a wholly owned subsidiary of international energy company Occidental Petroleum Corporation (NYSE: OXY).

It is based in Dallas, Texas, with manufacturing facilities in the United States, Canada and Chile. OxyChem is among the top three producers in the United States for the PVC, chlor-alkali, chlorinated organics, and other principal products it manufactures and markets, and is a global leader in the production of polyvinyl chloride (PVC).

OxyChem develops and sustainably manufactures indispensable chemicals used in a broad range of life-enhancing products, including: medical supplies, PVC pipe for delivering safe drinking water, and a variety of other long-lasting products essential to the automotive, electrical, and construction sectors. OxyChem is a founding member of the: American Chemistry Council's (ACC) Responsible Care® Health, Environment, Safety and Security initiative; Alliance to End Plastic Waste; and Vinyl Sustainability Council.

It is a participant in the +Vantage VinylITM program. OxyChemis committed to safeguarding the environment and the health and safety of its employees and surrounding communities.

OxyChem is growing, action-oriented and safety driven, continually striving to be the best in the business while staying focused on environmental protection.

Its greatest asset has been and will continue to be its people.
