

Ajax Tocco Magnethermic Japan Co., Ltd.

Company Description

Since its inception in 1965 Ajax Tocco Magnethermic Japan (ATMJ) has continued to bring the latest developments to market in the induction heating and melting business. These developments have stemmed both from a full time R&D facility at our parent company as well as joint developments with our customers around the globe. We are always looking for a better engineered solution to our customers' needs. Making use of our engineering know-how and experience, we will continue to provide the same dedicated service and commitment to our customers both inside Japan as well as those who are transplanting their operations abroad. With a global network of companies, we are dedicated to supporting our customers' needs no matter their location. Thank you for giving Ajax Tocco Magnethermic Japan the opportunity to serve your induction heating and melting requirements.
