

## Rittal K.K.

---

### Company Description

Rittal is a leading global supplier of enclosure systems, automation and infrastructure with its industrial, IT, energy and power, cooling and service units. Rittal products and solutions are used in over 90% of global industries – standardised, customised, and always of the very best quality.

Our delivery promise: Rittal standard products are delivered in Germany within 24 hours, and within 48 hours throughout Europe.

Improving efficiency through automation and digitalisation is one of the biggest challenges for our customers. This requires in-depth expertise, cross-sector networking and connecting new data spaces. And that is exactly our speciality and field of competence.

Our approach: Rittal, Rittal Software Systems (Eplan, Cideon and German Edge Cloud) and Rittal Automation Systems (RAS, Ehrt, Alfra) combine their hardware and software expertise to streamline, optimise and digitalise processes across the entire value chain for our customers including their IT infrastructure – from control and switchgear construction, machine building to factory operators or the energy sector.

Environmental and climate protection are a given for Rittal. We take our responsibility for a sustainable future seriously. Our approach to resource management and conservation involves continuous improvement of our own production processes and ensuring that our products have the lowest possible Product Carbon Footprint. Our solutions support our customers in achieving their own climate targets.

Founded in 1961, Rittal is the largest company in the family-owned Friedhelm Loh Group. The group operates worldwide, with more than 12 production sites and over 95 international subsidiaries. It has more than 12,000 employees and posted revenues of 3 billion euros in fiscal 2022. In 2023, it was presented with the “Best Place to Learn” and “Employer of the Future” awards. In 2024, Rittal received the Top 100 award as one of Germany’s most innovative medium-sized companies for the third time.
