

Spellman High Voltage Electronics Corporation

Company Description

Who We Are

Spellman, a family owned and managed company established in 1947, is the world's leading independent supplier of precision DC high voltage power supplies, X-Ray generators and Monoblock® X-Ray sources for medical, industrial and scientific applications. While we offer the broadest and most advanced range of standard and platform products in the industry, we specialize in partnering with OEM's to develop, produce and support the optimum solution for each system and market segment. We currently have five design centers, six production centers, eight repair locations and over 2,100 employees in North America, Europe and Asia.

Our Mission

Spellman advances medical care, industrial processes, quality control, scientific research, security and telecommunications by providing innovative high voltage power conversion solutions that enable equipment manufacturers to achieve their systems' performance, reliability, and cost goals.

Spellman High Voltage Electronics Corporation's Core Philosophy Our guiding principle is to Understand and Provide What Each Customer Values. We start by working closely with our customer's design teams to develop the right solution for each system and market requirement, and we continue by providing world-class production flexibility, quality and service throughout product life-cycles.

To help our customers succeed, we continuously improve three core capabilities that, together, provide unique advantages to our OEM partners.

High Voltage Expertise

Spellman's design teams in North America, Europe and Asia form the world's largest, and most experienced group of technical specialists dedicated to the development and production of advanced HV power conversion products. Driven by customer requirements for precision power used in a broad range of high-tech applications, our engineers constantly push performance and reliability limits while optimizing cost and size. We also partner with select critical technology providers to develop proprietary HV materials and components that enable us to achieve these goals.

Global Presence

Becoming a best in class partner to our customers is not a "once and done" project at Spellman. We are continuously evaluating, optimizing and upgrading our world class production centers to maximize flexibility and process control and drive out cost.

In addition to investing in global resources such as low-cost manufacturing centers, and in providing the skills, resilience and competitive costs our customers need, we are also dedicated to providing superior local support. With best in class manufacturing facilities and service centers located strategically around the world, Spellman stands ready to support your needs when and where you need it.

Build for Tomorrow

Spellman is about the future. By investing now to develop our people, plants, processes and technology, we ensure that we can support your needs today, and will be ready to help you succeed for years to come. Our goal is long-term, responsible and sustainable growth. Thus, we strive to operate in an environmentally and socially responsible manner, and are proud of being one of the first companies in our field to receive ISO14001 certification.

Our Commitment: To Understand and Provide What Each Customer Values.

We invite you to explore the many advantages of partnering with Spellman. We look forward to working with you to provide the high voltage technology that your next generation systems demand. We hope you will challenge us to provide the best solutions for your requirements.

Company Details

Head Office

United States

Main Business

高圧電源、X線発生装置及びMonoblock@X線源の製造・販売

President

Ken Okada

Established

1947年
