

MetroResidences Japan K.K.

Company Description

About Metroresidences

MetroResidences is a property tech company founded in Singapore, currently operating in Tokyo with a focus on managing and leasing serviced apartments and mid- to long-term rental properties. We currently manage over 500 units and are entering a growth phase with a clear goal: to double our scale in the coming years.

Our online rental platform allows users to complete everything from property search to contracts and payments entirely online — all tailored for stays ranging from 1 months.

With over 95% of our contracts finalized digitally, we're proud to be leading the digital transformation of the rental experience in Japan. Our service is rated 4.5 on average across 300+ Google reviews, highlighting our commitment to convenience and transparency.

Our Japan office consists of a compact team of around 15 people, working closely with international counterparts to serve as a key hub for our business expansion in the Asian market.

We are now looking for new team members to help accelerate our growth and strengthen our operations.

If you're someone who enjoys building systems from scratch, working in a fast-moving, multicultural environment, and making a direct impact in a startup where every individual plays a key role — we'd love to hear from you.

※MetroResidences is funded by 500Startups and Rakuten.
