

Maxim Integrated

Company Description

Empowering Design Innovation

Every day, electronic devices are becoming smarter with greater integration. Body sensors can monitor our health. Cars can drive themselves. Networked homes can power up when needed.

At Maxim Integrated, we're solving engineering problems and empowering design innovation, enabling our customers to create products that shape our world. Our innovative and high-performance analog and mixed-signal products and technologies make systems smaller and smarter, with enhanced security and increased energy efficiency.

Building a Smarter Future

From our sensor platforms to our IC solutions for embedded security, power management, interface, communications, and much more, our technologies empower design innovation.

Company Details

Head Office

United States

Main Business

・自社製アナログ/ミックスド・シグナル製品の販売、サポートの提供 ・設計に関するツール、情報、リソースの提供

President

林 孝浩

Established

1984年08月

Capital

4億円

Number of Employees

51 - 100
