

Sygnajapan.

Company Description

As of June 2024 our brand name has been changed to CTA (COMMTECH ASIA)

Sygnajapan is a fully independent international leader in commissioning and technical project management. We deliver the kind of high-functioning spaces you see in data centres, commercial offices, gigafactories, pharmaceutical laboratories, and historic buildings.

From inception and commissioning, through to post-occupancy, we certify your building services and technology systems to ensure your design is delivered faithfully and reliably.

December 2023 marked a significant step change for the business with the EMEA senior management team completing an exciting management buy-out of Sygnajapan (EMEA).

Following the MBO, we at Sygnajapan are on course for a record-breaking year and, under full ownership of our senior management team, look forward to continuing to grow our client relationships.
