

Aillumission Co., Ltd.

Company Description

We are a group of solution proposals that starts from the customer's problem and leads to the solution.

We provide creative and high-quality ideas and solutions to customers with actual and potential issues, and treat them as professionals and reliable partners who work together to solve problems. We are proud to create a bright future with technology by directing individual technological and creativity to one and the same vector.

Our company was founded in June 2013, and is currently developing our business with "4G / 5G mobile network construction, ICT network construction, DX promotion / AI solution development" as our core business.

[Services]

We specialize in business automation services and network communication & security operations that utilize AI & Robot in the ICT industry.

- **Mobile infrastructure network**
- **ICT Solution**
- **AI business efficiency consulting**
