

Gentherm Japan Inc.

Company Description

Gentherm -Technology to the next degree™
Leading a revolution in thermal management

People know us as a thermal company.

OUR MISSION

Creating and delivering extraordinary solutions that make meaningful differences in everyday life, by improving health, wellness, comfort and energy efficiency.

Global Capabilities

We are more than 13,000 employees in 12 countries leveraging our experience in thermal management solutions with our proven ability to create markets through innovation. We offer global engineering, prototyping, testing, production, sales and support and collaborate with you to tailor solutions to your needs.

We are the global leader in thermal management systems, and we take pride in our dedication to create innovative, well-designed products that are manufactured to the highest standards.

We are Gentherm.
