

Laketricity Japan Co., Ltd.

Company Description

We understand that historical and current energy productions have had unintended consequences for the environment, for this we are deeply engaged in the clean energy transition.

Our mission is to deploy solutions to positively integrate renewable energies into its local environment. We strive to promote and accelerate floating solar project development while offering the optimum solution to add value to your real estate.

As part of Ciel & Terre Group, Laketricity has nurtured a large and reliable technical background, conceiving the best solutions to develop safe and sound floating solar power plant. Since 2015, we have developed more than 90 projects around the world from 100 kWp to 20 MWp, we tailor made the project to your needs and specific site characteristics.
