

MAHLE Japan Ltd.,

Company Description

MAHLE is a leading international development partner and supplier to the automotive industry as well as a pioneer and technology driver for the mobility of the future.

The MAHLE Group is committed to making transportation more efficient, more environmentally friendly, and more comfortable. MAHLE is continuously optimizing the combustion engine, driving forward the use of alternative fuels, and laying the foundation for the widespread acceptance and worldwide introduction of e-mobility.

Based on a broad systems competence consisting of Engine Systems and Components, Filtration, and Thermal Management, the group's product portfolio addresses all the crucial issues relating to the powertrain and air conditioning technology. Thanks to its expertise in electric and electronic components and systems, MAHLE can thus also offer integrated system solutions for e-mobility.

MAHLE products are fitted in at least every second vehicle worldwide. For decades, MAHLE components and systems have also been used on the world's racetracks and off the road—in stationary applications, for mobile machinery, rail transport, as well as marine applications.
