

IDK Corporation

Company Description

IDK Corporation is Japanese manufacturer headquartered in Kanagawa Japan with sales, fulfillment, service, and support operations in the USA, Europe and Asia. For over 30 years, our market leadership and unwavering commitment to providing both exceptional and high-quality equipment has helped shape IDK to become a world leader in the Pro AV market.

We've been successfully riding the new-technology wave by creating and providing state-of-the-art Pro AV products; such as, multi switchers, video converters, matrix switchers, and AV over IP systems. We, as a leading provider of high-quality solutions for the Pro AV industry, develop, manufacture and test all IDK products at our own facilities in Japan. With all operations fully in-house, we have the unique ability to add features and evolve our product's performance rapidly, as technology advances and as needed to meet expanding user demands. Being vertically integrated, we can also preemptively manage supply chain challenges, while closely monitoring our product quality. As technology is continually being reshaped, we are stepping up our efforts at IDK and are committed to making the next big leap for the Pro AV industry.

IDK is not only committed to creating and developing best-in-class AV equipment, but we are also committed to our planet and environment. The entire IDK organization supports our social responsibility policy and we are continually conducting activities based on the three "R's"; Reduce, Reuse, and Recycle. This way, we are doing our part to reduce our footprint ensuring that we leave a healthy, clean planet for future generations.
