

POLÈNE

Polène Japan CO., LTD

Company Description

Founded in 2016 by three siblings, the French House of Polène creates leather goods that combine minimalism and creative expression in order to offer unique and signature shapes achieved through excellent craftsmanship.

In the Paris studio, the leather goods are designed in a refined and timeless style with a distinctly creative touch. The perceived suppleness and light-weight look of the models is only possible through intricate technical development mastered by the designers.

The leather, sourced exclusively from Spanish and Italian certified tanneries, is sculpted to create organic shapes, folds, draping or weaving.

All production is entrusted to the craftsmen of Ubrique, a Spanish town specialized in luxury leather goods.

In keeping with their promise of quality and creativity, the House unveils a new line of accessories: jewelry. Themed collections exploring nature and its forms of expression, from the undulating movements of the wind to sculpted rock textures. A collection gilded with 24-carat gold and crafted by artisans in Italy.
