

NTK INTERNATIONAL CORPORATION

Company Description

We face economic changes on a global scale, we often hear that now is the time to think and act globally. Amid such environment, NTK has always been providing advanced technologies and products to industries, utilizing our global network and perspectives.

In the current business environment, where outstanding technologies, materials and products are born every day around the world, we believe that it is our mission to seize every opportunity, act with agility and aggressiveness, and to make contributions to society. Since the establishment in 1973, we, as a trading company specializing in aerospace products and services, have presented and provided innovative technologies from the U.S. to Japan ahead of all others, building a track record of achievements and making significant contributions to industries.

In an age when advanced technologies and products are emerging at an exponential speed, we pride ourselves on our unique strength of being able to promptly respond to the needs of every customer while emphasizing strict regulatory compliance at the same time. Building on this strength, we aim to become a specialized trading company that can provide sophisticated engineering services based on the accumulation of experience and special expertise, with the flexibility to respond promptly to changes in society.
