

Ecoplexus Japan K.K.

Company Description

Ecoplexus develops, constructs, owns and operates Renewable Energy projects at utility scale in the U.S., Mexico, Japan, and Southeast Asia. The Company has developed, financed and constructed over sixty projects to date. Customers for its renewable energy include major utilities such as PG&E, Duke, Progress, Xcel Energy, Georgia Power, PSEG, Tokyo Electric Power, Tohoku Electric Power and approximately fifteen Municipalities or State governments in the US. Ecoplexus owns more than 400MWs of renewable generating assets, and has 1500 MWs either in construction or contracted in the U.S., and Internationally. Representing over \$1 Billion in project value, Ecoplexus is actively developing or buying renewable energy assets at every stage and has a global pipeline of over 10,000 MWs. The Company also provides Operation and Maintenance (O&M) and Asset Management (AM) services for all its owned assets as well as for third party investor/owners, including a group of Fortune 500 companies.
