

MAEDA & PARTNERS

Company Description

We currently represent the world's leading companies in various technology fields including electronics, mechanics, physics, information technology, chemistry, biotechnology, etc. for filling application of patent, trademark and design registration and also provide consultation on corporate intellectual property matters.

Our firm was founded in 1977 in Osaka to support companies large to small in western Japan, mainly in so-called Kansai region (Osaka, Hyogo, Kyoto, Nara, Wakayama and Shiga), in dealing with procedures of domestic patents and trademarks.

Since our foundation, we have been actively engaged in representing many domestic clients before the Japan Patent Office and working with competent and experienced foreign firms to help domestic clients obtain strong intellectual property rights including patents and trademarks in foreign countries. We also have represented foreign clients before the Japan Patent Office for filling applications of patents, trademarks and design registrations and support them in obtaining strong intellectual property rights and exercising their intellectual property rights. We have expanded our activities in many regions in the world and have made efforts in engaging in global intellectual property business.
