

BioChromato, Inc.

Company Description

BioChromato is a Japanese manufacturer of unique products that support research efficiency for chemical laboratories.

BioChromato was founded in 1983, and our business is to enhance the efficiency of research and development in the pharmaceutical industry and biotechnology related fields through the development of laboratory instruments and consumables. We have acquired knowledge and expertise in processing metal and resin materials through engineering experiences in manufacturing semiconductor devices. Now, we are applying our strength to product development in our targeting market.
