

## SEED SUPPLY INC.

---

### Company Description

SEEDSUPPLY INC. is a contract research organization, and we have the technology to identify seed compounds that lead to first in class drug.

Service1\_Binding compounds screening: HTS for unexplored drug targets that could not be handled by conventional HTS methods (e.g., ER transporter, lysosomal channel) using special binding assay technology and compound library (>400K) from Takeda. We can also identify compounds with unique profile (e.g., modulator, PROTAC).

Service2\_Binding proteins identification: Identification of the binding proteins of your compounds without any modification using binding assay technology and human protein libraries (>18,000 proteins).

Service3\_Supply each binder for 200 of GPCRs and 100 of SLC transporters.

### Company Details
