

MASUI CO.,LTD.

Company Description

A company is its people

The group's core company, MASUI Co., Ltd., was founded in Kyoto's Nishijin district in 1909, and in the more than hundred years since, we have been putting into practice its mottoes of "like seeks like" and "cherish harmony between people"

Starting from silk business, we have expanded our business focusing mainly on yarns and now dealing with various kinds of synthetic and natural fiber materials, such as viscose rayon, polyester, acrylic, cotton, linen and others. Looking into the future, textile industries have to adapt to environmental change as regions, materials and people's sustainability concerns are growing and the 3rd AI boom is changing commercial distributions.

We would like to expand our business together with our customers and suppliers as through personnel training to a person who can make a business portfolio that continuously progress to meet any society change and grow further.
