

ezCaretech Japan Co.Ltd.

Company Description

About us

ezCaretech stands as a prominent EHR platform, consistently achieving significant advancements in the healthcare industry. As a leading EHR provider, we bear a strong sense of responsibility for the positive impact our solution has on enhancing clinical care, patient safety, and work efficiency. We are driven to prioritize our clients and work constantly towards a brighter future.

ezCaretech Japan Co., Ltd

ezCaretech established ezCaretech Japan in Tokyo, Japan in 2020 to further expand its overseas market. Through the local branch, ezCaretech effectively conducts contract management, maintenance, etc. including sales and marketing activities for the local Hospital Information System(HIS).

In January 2021, a contract with St. Marianna University Hospital in Japan to build a next-generation HIS was signed. ezCaretech has been raising stature as leading digital healthcare company by exporting HIS to Japan for the first time in the history of Korea.

We, ezCaretech, plan to further expand the global market to the Asia-Pacific region, starting with the project in Japan.
