

Impact Circle, Inc.

Company Description

CREATE A SOCIETY CIRCULATING SOCIAL IMPACT

Our Mission

By creating opportunities and visualizing impact, we expand possibilities and build the future.

One reason social issues remain unresolved is that the necessary resources are not gathered due to the invisibility of the social returns (impact) generated by outcomes. The impact is hard to see because its value is diverse and highly individualized. Impact Circle, Inc. aims to solve social issues by providing a decision-making framework through the practice of impact creation and visualization. We work to generate a cycle of impact. As a FinTech startup, we aim to become a platform for impact investing by systematizing and generalizing the expertise involved in impact visualization and reporting. By doing so, we offer new opportunities for impact investments to investors.

Our Services

Creating opportunities through impact finance and providing impact visualization services

Impact Circle aims to provide a new framework for evaluating decision-making by creating opportunities through impact finance and visualizing impact.

This initiative strives to generate unprecedented flows of capital and aims to address social issues.

By systematizing and standardizing the process of impact visualization, we are working on building a platform for impact data.

Company

Impact Circle, Inc. is a startup that offers impact visualization services by systematizing and turning into expertise the process of impact visualization through its operation of providing impact finance.

Team

We are creating impact in both Japan and emerging countries by building a global team of experts in business development, microfinance, and governance.
