TOKYO International Dental Clinic Roppongi

## TOKYO International Dental Clinic Roppongi

---

### Company Description

Based on the idea that "I want patients to spend a relaxing time", I came up with the idea of a space of a detached house in Roppongi.

If you have an image of "the dental clinic is dark and scary", you will be surprised by the atmosphere different from the dental clinic so far.

Tokyo International Dental Roppongi provides dental care that meets the needs of the local community, based on Scandinavian dentistry, which is the basis of the director's practice.

In 2014, we opened a clinic in Azabu-Juban with more extensive medical equipment and training facilities by integrating with Minami-Aoyama's pioneering endodontic and periodontal clinic, Miyashita Dentistry.

At our clinic, we aim to be a dental clinic where patients can receive dental treatment with peace of mind.

We take the time to listen to your oral concerns and provide information and treatment in an easy-to-understand manner.

We look forward to helping you maintain your oral health.

理事長 宮下 裕志 Hiroshi Miyashita, DDS

スウェーデン王立イエテボリ大学公認「歯周病専門医」、イエテボリ大学認定「歯内療法専門医」
