

NAKAKITA SEISAKUSHO.CO.,LTD.

Company Description

Since our founding in 1930, we have striven, under the corporate motto of "Frontier Spirit," to provide a one-stop reply to all of our customers' needs, from development, to manufacture, to maintenance, when it comes to fluid control systems, centered on valves.

However, as the world is constantly changing, we have adopted the new theme of "challenge" with regard to taking on new opportunities while also clinging on to the "now." Our goal is to continue to refine our product development that has up until now put our customers' requests into a concrete shape, while taking up new technology development and providing our customers with new value and convenience.
