

KOALA Tech Inc.

Company Description

KOALA Tech Inc. was founded in March 2019. It is a venture that originated from Kyushu University, established with the goal of commercializing OSLD. The company aims to develop and commercialize a laser that is highly compatible with the organic electronic device platform. This includes Organic Light Emitting Diode (OLED) devices, which have recently gained attention as high-definition and flexible displays. We intend to provide new solutions to users in the organic semiconductor device field, contributing to a future smart society where humans and technology coexist.
