

## EMBALL'ISO Japan

---

### Company Description

EMBALL'ISO has been helping pharmaceutical laboratories, clinical trial operators, logistics companies and “last mile specialists” to manage and control cold chain risks **for 30 years**

A world leader in the design and manufacture of **high performance temperature-controlled packaging systems for the transport of pharmaceutical products**, EMBALL'ISO is now an **expert of turnkey Reverse Logistics and Rental solutions**.

With 11 production sites on 4 continents (Brazil, China, France, Germany, India, Mexico, Singapore, Japan, United Kingdom and United States), and more than 15 service centers and recovery partners in over 80 countries, EMBALL'ISO helps you reuse isothermal packaging, saving you time and money while reducing your environmental impact.

- EMBALL'ISO products are designed, tested and validated by an in-house R&D team and design office, ensuring that the temperature remains between -80°C and + 37°C with Gel- and phase change material- (PCM) based thermal stabilizers. Systems are capable of carrying a single vial to airfreight pallet shippers available flat packed or fully assembled
- Turnkey services to optimise the cold chain are available: Rental, Ready to use, Reverse Logistics, Connected and Customised Solutions
