Company Description

Sygna is a new global brand delivering commissioning management and technical services across the built environment. Founded on the coming together of two established brands, Commtech Asia and Logi-tek (UK), Sygna operates across both the European and Asian continents and will soon deliver across the Americas region.

We are Sygna.

We are independent technical specialists, working across all aspects of today's complex building services systems for built environments. Since 1999, our customers have been relying on our technical excellence to ensure the success of new construction, fit out or refurbishment projects around the world.

Our people are specialist engineers with multi-disciplinary expertise and unrivalled experience, driven with a vision to unlock the full potential of built environments, so people and businesses can realise theirs.

We provide independent building commissioning services and integrated project solutions for owners, developers, end users and occupiers. Our multi-sector expertise and cross-service capability are focused on all aspects of building services systems — regardless of scale, challenges or complexities, we work collaboratively to enable smarter and better outcomes.
