Job Description

- Plan, design, build, and migrate to optimize the entire IT infrastructure environment of our clients through the cloud.
- Use advanced technology and knowledge of the cloud (AWS, Microsoft Azure) to provide support as a member who is familiar with the overall cloud infrastructure architecture and various services provided by public clouds.

Specific work examples

- Formulate governance policies and rules to be followed when designing systems in a cloud environment.
- Provide initial consultation on cloud architecture and adopted technologies for new development projects
- Support review of various vendor creations
- Pre-consultation on the allocation of cloud environments, and serve as a liaison office for requests to provide cloud infrastructure
- Design and implement operations in hybrid/multi-cloud environments

- Improvements to common cloud infrastructure, and improvements to security quality
 - Consider cloud cost optimization
-

Required Skills

◆ Application requirements

- Experience in defining requirements, design, development, testing, and operation, regardless of whether on-premise or on-cloud
 - Knowledge and experience in designing and building the architecture of the entire cloud technology infrastructure
 - Considering and implementing cloud-native solutions
 - Experience in technical evaluation and selection that takes into account not only functional requirements but also non-functional requirements (availability, performance, security, cost, etc.)
 - OS skills (Windows server, Linux)
-
