Job Description

Successful candidates will join a passionate, fast-paced, and dynamic team.

Primary Responsibilities:

- The Business Consultant will oversee the entire implementation process and resources while maintaining relationships with customers.
 - Collaborate with clients, end users, technical architects, and application designers to define data requirements and structures for business intelligence (BI) applications.
-

Required Skills

- Candidates with a minimum of 2-5 years of consulting experience in software products and related industries are eligible.
 - Proficient in presenting complex development topics to both management and engineers.
 - Possess a working knowledge of professional BI tools and solution providers.
 - Ability to work independently while managing multiple tasks.
 - Strong oral and written communication skills, including presentation skills (MS Visio, MS PowerPoint).
 - Strong problem-solving and troubleshooting skills with a demonstrated ability to exercise sound judgment.
 - Ability to analyze, map, and design business processes.
 - Must have experience in conducting requirement analysis, interviewing business owners, and analyzing current situations.
 - Proficient in developing conceptual and technical designs, including the use of object-oriented analysis and design techniques.
 - Experience in identifying business challenges and proposing/developing solutions.
 - Hold a bachelor's degree in a related field and/or possess an equivalent educational background and experience.
-
