Job Description

Job Description:

The SAP SD Consultant / SME is motivated to take strong ownership on actions, to find innovative ways to improve the services' agility and efficiency, and to continuously gain more skills.

Responsibilities

- Point of contact and subject matter expert for SAP SD delivery and operations teams
- Experience in implementation phases, gap-fit analysis, configuration, build, testing, rollout, and post-implementation support for SAP S/4 HANA (Brown field & Green field implementations).
- Team member to implement new functionalities and improve existing functionalities including requirement analysis

- and converting them into effective solutions.
- Prepare functional specifications for reports, interfaces, enhancements, forms, and conversion programs for SD functionalities.
- Experience in working with teams to prioritize work and drive system solutions based on business needs
- Work with developers and other SAP team to make sure that the developments and custom components meet application requirements and performance goals.
- Fix any defects and performance problems discovered in testing.
- May be required to work on pre-defined shift plans and/or be on standby for operations support.
- Own Service and Incident Management and involve in change management process
- Drive automation in the SAP SD areas.
- Drive best practices within teams with respect to SAP Industry specific solutions.
- Develop strategic SAP Roadmaps for our customers covering key topics and initiatives
- Develop Build and drive management relationships with large, global customers
- Identify customer needs and advise on DXC services & solutions
- Develop S/4HANA transformations scenarios
- Identify and drive sales opportunities together with the account teams.
- Interface with customers and own all deliverables for customers.
- Define continuous improvement plan and drive its execution.

Required Skills

Primary Skills and Qualifications

- Candidate should have min of 6 + years of SAP SD functional experience with atleast 2 End-to-End S4 HANA Implementation Projects. Specializing in (Brown field & Green field) implementation and support.
- **Fluent in Japanese language (speaking, reading & writing) being able to communicate well with Japanese customer (N1 or N2 certified)**
- Experience in Business requirements gathering, providing conceptual and detailed designs to meet business needs, performing necessary SAP configurations, testing, cut over, post-go live support.
- Knowledge in preparation of detail specifications for Reports, Interfaces, Enhancements and Forms development of custom programs
- Team player having experience in coordinating across Modules and with the technical team.
- SAP Certification is an added advantage.
- Well-versed with SAP Activate Methodology.
- DevOps & Agile methodology experience, working with small agile teams with strong ownership and drive.
- Ability to learn and adapt to new frameworks/technologies and quickly integrate with them for automation of service delivery.
- Must have experience of working on pursuit activities including project planning for atleast 3 deals / Projects.
- The candidate should be a Degree in BE/BTech/MSC/MBA/MCA with good academic records from premier institute.
