## Job Description

Manage and maintain a large database for the end-client, a major Japanese pharmaceutical company. Work in an international environment and develop your skills, with many flexible career paths working for one of the top IT system integrators in the world.

**Client Details**

Our client is well-known within the IT industry offering cutting edge technology solutions, from IoT to AI/ML. In just three decades, it has grown from a small team to a Fortune 500 company now operating in over a dozen countries worldwide. Named also as one of the fastest-growing companies in the industry for a decade straight, our client continually provides top-quality services, drawing in a revenue of tens of billions in USD a year.

**Description**

- Create and configure new Oracle instances, building Oracle databases using ASM
- Implement AWS cloud to on-premise databases
- Manage data security, back-up, reporting, and recovery procedures
- Perform end-to-end support of AWS RDS and Aurora Databases

**Job Offer**

- Work in a diverse environment at a top software company
- A work culture rated by over 75% of former and current employees as positive, according to a third-party source

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Patrick Phan on +81 3 6832 8925.

## Required Skills

- MUST have hands-on experience with AWS infrastructure/services
- 6 years of experience as a database administrator (DBA)
- Oracle or AWS certificates are a plus
- Fluency in English and conversational Japanese OR fluency in Japanese and conversational English

## Company Description

Michael Page is one of the world's leading professional recruitment consultancies, specializing in the placement of candidates in permanent, contract, temporary and interim positions with clients around the world.
