### Job Description

My client is constantly pushing the boundaries to shape a better future. They seek creative and diverse Digital Minds to contribute to tomorrow's reality.

Their Software stands at the forefront, providing cutting-edge solutions for designing, simulating, and manufacturing products across diverse industries. From Formula 1 cars to skyscrapers, their Product Lifecycle Management (PLM) software plays a crucial role in bringing these visions to life.

**Position: Technical Manager (Lead Engineer)**

As a Technical Manager, you will design optimal system solutions for each project, ensuring adherence to requirements and processes.

Key responsibilities include:

- Finalizing architecture design during development
  - Providing solutions using our framework
  - Customer engagement during product introduction and implementation
  - Serving as the technical leader of the project and supporting project management tasks
- 

## Required Skills

### Requirements:

### Knowledge/Experience:

- Over 5 years of experience proposing and implementing solutions for manufacturing industry software (Teamcenter, Tecnomatix, Polarion, Mendix, etc.)
- Solid knowledge of software development principles, programming, infrastructure, and databases

### Skills and Abilities:

- Excellent communication skills

### Additional Knowledge/Experience:

- Experience implementing our products or equivalent solutions
  - Project management or leadership experience
  - Business experience in related industries or roles (leading SIs, software vendors, foreign-affiliated consultants, etc.)
  - Previous employment with our partner company
-
