Job Description

As a specialist in the infrastructure field of our company, which provides BX support including digital commerce and digital marketing, our mission is to build and operate infrastructure in general, with a focus on AWS.

The following tasks in AWS: infrastructure requirement definition/design implementation, verification/implementation of commercial/OSS software, creation/monitoring/backup of new project proposals and estimates, etc.

Construction/management

- Collection of security information and selection/application of necessary patches
- Performance tuning and troubleshooting for networks and middleware

Required Skills

- Experience building/operating infrastructure on AWS
- Experience building/operating Linux servers
- Experience negotiating with clients

Desired experience/skills
- AWS certification (solution architect, developer, SysOps administrator)
- Experience building/operating infrastructure using Microsoft Azure and Google Cloud
