Job Description

Are you ready to lead cutting-edge projects in the dynamic realm of IT Operations, Site Reliability Engineering, and DevOps? Our client is seeking a talented Project Manager to spearhead end-to-end project execution, platform design, and implementation while ensuring top-notch performance tracking and reporting. If you thrive in a fast-paced environment and are passionate about driving innovation, this role is for you!

Responsibilities:

- Develop comprehensive project timelines and schedules to ensure smooth execution.
 - Craft and execute detailed plans for development and operational activities.
 - Identify potential risks and proactively devise mitigation strategies.
 - Collaborate with stakeholders to manage backlog effectively.
 - Lead all agile project ceremonies, including daily stand-ups, backlog grooming sessions, and planning and review sessions.
 - Maintain workload balance and optimize resource management for SRE and DevOps teams.
 - Leverage your technical writing prowess to deliver compelling presentations.
-

Required Skills

Required Skills:

- Minimum of 2 years of experience in enterprise project management.
 - Proficiency in at least one major project management methodology (Agile, Waterfall, Kanban, etc.).
 - Solid understanding of IT operations, ITIL, Site Reliability Engineering, and DevOps principles.
-
