Job Description

Are you ready to bridge the gap between infrastructure and advanced service development in the exciting realm of Observability + AI? Our client is seeking a talented Application/Service Development Engineer to join their dynamic team and take on the challenge of designing and developing cutting-edge services while leveraging their Monitoring as a Service platform. If you're passionate about tackling large-scale development projects and thrive in a collaborative environment, this opportunity is for you!

As an Application/Service Development Engineer, you will play a crucial role in designing, implementing, and maintaining services that utilize Monitoring as a Service platform. You will work closely with the experienced infrastructure engineers to deliver innovative solutions at scale.

[Job Contents]

- Analyze requirements and design features/services that seamlessly integrate with the platform and infrastructure.
- Lead the development process, ensuring timely implementation and thorough testing.
- Participate in design reviews and provide constructive feedback.
- Release and manage deployment processes, including troubleshooting and on-call duties.
- Operate and maintain production systems, providing user support as needed.

[Development Environment]

- Languages: Go/Python
- Infrastructure: Kubernetes in a private cloud
- Process: Combination of Scrum and Waterfall methodologies
- Documentation: Confluence
- Task Management: Jira
- Communication: Slack/MS Teams/Viber
- CI/CD: Jenkins
- Monitoring: Prometheus/Grafana/ELK

Required Skills

- Strong understanding of infrastructure concepts, including Kubernetes, containers, and Linux.
- Experience in software design, implementation, and testing using Golang and Python.
- Proficiency in software architecture design, including UML.
- Demonstrated leadership experience with a focus on execution and delivery.
- System maintenance and operation experience, particularly in Observability.
- Strong logical thinking skills and the ability to structure complex issues effectively.
