We are currently looking to hire an **Business Analyst** who is has proven track record in the IT field. This is an exciting opportunity to expand your skill set, achieve job satisfaction and work-life balance.

## Job Overview

### Work location - Multiple location available - Tokyo and nearby cities

Cargo Domain Subject matter expert with Cargo Handling with Slot and Door Management experience

As a expert pecializing in the airline cargo domain, you will play a pivotal role in analyzing business processes, gathering requirements, and facilitating the successful implementation of technology solutions within the handling and Slot & Door Management operations. You will collaborate with cross-functional teams to drive operational efficiency, enhance customer experiences, and optimize the processes

---

## Required Skills

- Collaborate closely with stakeholders, including operations managers, IT teams, and end-users, to understand business needs and requirements.
- Analyse and document existing cargo operations processes, identifying areas for improvement and optimization.
- Gather and document detailed business requirements, translating them into functional specifications for technology solutions.
- Work closely with development teams to ensure accurate implementation of business requirements, and facilitate effective communication between technical and non-technical stakeholders.
- Conduct feasibility studies, impact analyses, and gap assessments for proposed solutions to ensure alignment with business goals.
- Assist in designing, testing, and implementing software solutions, ensuring they meet business needs and quality standards.
- Perform data analysis and provide insights to drive informed decision-making within the cargo domain.
- Collaborate in user acceptance testing (UAT) and facilitate training sessions for end-users to ensure successful solution adoption. Qualifications Bachelor's degree in business administration, Information Technology, or related field. Masters degree is a plus.
- 8+ years of professional experience as a Business Analyst, preferably in the Cargo Handling and Slot & Door management
- Strong understanding of air cargo operations, including booking, reservation, capacity management, and air waybill processes.
- Proven experience in gathering and documenting business requirements and translating them into functional specifications.
- Familiarity with Agile methodologies and the software development life cycle. • Excellent analytical, problem-solving, and critical thinking skills.
- Strong communication and interpersonal abilities, capable of collaborating effectively with cross-functional teams.
- Proficient in using business analysis tools, techniques, and documentation standards. Speaking Japanese language is a must.
