Job Description

【 **About the company** 】

Develops support services for data utilization using privacy tech technology.
Provides AutoPrivacy, a service that builds a data clean room (an environment where data from multiple businesses is crossed and utilized while protecting privacy).
Development of Data Anonymizer, a service that automatically detects and masks personal information entered in ChatGPT prompts. (Beta version as of February 2024)
Development of support business related to the introduction of privacy-enhancing technologies (PETs) and the development of new services and products utilizing PETs.

Operates the PrivacyTech Institute, a website that disseminates information related to privacy tech.
With the mission of "Solving social issues with privacy tech," the company's purse is "Creating a discontinuous future, overwhelmingly.

【 Job Description】

■Your Role
You will be responsible for building the UI/UX of AutoPrivacy, the company's data clean room (DCR) product, and communicating the product's value to users to the fullest extent possible as a Front-End Engineer.
This is a position where you can contribute greatly to the growth of the product by understanding what users want and accurately translating those needs into the product, since you will be developing the product from a position closest to the users.

■Responsibilities
Construction of UI/UX
In order to provide users of "AutoPrivacy" with an experience that allows them to manipulate data efficiently and enjoyably, you will build a UI/UX that pursues intuitive usability and visual appeal for users.
Propose UI/UX improvements and build them
Responsible for proposing and building UI/UX improvements based on user feedback and behavioral data. In addition, pursue optimal UX by utilizing A/B testing, etc.
Design and implementation of front-end architecture
Design and implement scalable and easy-to-maintain front-end architecture in collaboration with back-end engineers and others. In the process, you will also work on performance improvement and code quality improvement.

■Features of the team
The UI/UX team, to which the front-end engineers belong, specializes in building UI/UX for products that are valuable to users by rapidly turning from acquisition of user needs to product verification.
The company's organization is made up of outstanding members from not only business development and product development, but also R&D, which researches and develops privacy tech, and business law, which is a group of legal experts.
The UI/UX team works with various teams to develop products.

■Attractiveness
The company is in an interesting phase where it is going to grow more and more!
With the start of full-scale provision of DCR in the company's product AutoPrivacy, the company is about to grow significantly.
This is a challenging position where you can contribute greatly to the growth of the product, the company, and the market by joining us at this stage when the company is still in the start-up phase.
Let's work together to create the world's No.1 privacy tech company!

■Development Environment
Common
CI: GitHub Actions
Environment: docker-compose, k8s, Docker, Terraform
Infrastructure: GCP, AWS, Azure, On-pre
Tools
Source code management: GitHub
Documentation: Notion, GitHub
Communication: Slack, Discord
Product Development
Technical environment: Typescript, React, Next.js, GraphQL, RESTful API, Go, Python, FastAPI, gRPC, Hasura, PostgreSQL, Cloud Run, GAE, Cloud SQL, Monorepo, Argo Workflow
R&D Core Technology Development
Technical environment: C++, Go, Python, Julia, gRPC, Envoy, Bazel, Monorepo

----
【 Working conditions 】

< Welfare >
Full Social Insurance
Telecommuting System

< Working hours >
Flextime System

< Holiday >
Saturday, Sunday, National holiday
Annual paid leave
New year holiday
Parental Leave
Special Paid Leave
Bereavement Leave
Summer Holiday

Required Skills

■Required

Experience in front-end development of commercial services

Experience developing, deploying, and operating applications using modern front-end frameworks (React, Vue, etc.)

■Preferred

Experience in front-end development while designing product mockups using Figma, etc.

Experience in conducting user interviews and improving product functionality

Experience developing and publishing applications using Next.js, Nuxt.js, etc.

Experience developing enterprise toB products

Knowledge of DWH, DCR, BI tools (and related products, SaaS, etc. development)

■Ideal Applicants

Empathy with the values of Be Cool, Be Hacker

Beginning to feel like you have a small mountain to climb and want to challenge yourself in a larger market

Craving an environment where you can take on a challenge so big that you can bet your life on it

Good at creating something that sticks with your customers quickly, rather than spending a lot of time pursuing professional design.

CTOs and MGs who are desperate for small business products

Are in an environment where you've wound up with important tasks that you've been forced to do
