Job Description

【About the company ...】

The company is a software company whose corporate message is "Speed up your Business."

They accelerate their customers' businesses in various fields such as medical, manufacturing, finance, and entertainment by parallelizing and optimizing software to efficiently utilize multi-core processors and accelerating applications using new

memory technology that realizes power saving and high-speed IO, thereby achieving green IT.

[Job Description]

Software development for realizing a robot system

[Specifically, they will]

Development, porting, and speeding up of robot-related algorithms (self-position estimation, obstacle recognition, path planning, and driving control)

Development, porting, and speeding up of image processing and image recognition programs

[What is challenging about this project?]

You can be involved in the cutting edge of the field of automated driving, which is attracting more and more attention every day.

You can be involved in the realization of robots by demonstrating your own technology.

You can immerse yourself in coding and think only about technology.

Improve your skills by sharing technologies with optimization specialists and automated driving engineers.

[Working time]
