Job Description

----- 【About the company ...】 -----

The company provides consulting, system development and operation services for cloud, mobile, big data and voice recognition technologies based on its management philosophy of "Continuously contributing to the creative activities of all people through open-mindedness and high technology.

As a group of highly regarded engineers, they will continue to provide continuous business support based on their ability to

make proposals that are closely aligned with their customers' business issues and their accumulated and formalized know-how.

◆ Open-mindedness

The company's style is to have a broad perspective and to be proactive in everything they do. With professionalism from the creator's point of view and sales awareness from the consumer's point of view at the core, each and every employee solves problems with the motto of on-site proposals and speedy decision making. With their flexible and dynamic attitude, they have supported more than 2,000 businesses since their establishment.

◆ High level of technology

They are always interested and challenging themselves to work on new technologies. They advanced and highly specialized technical capabilities have been recognized in the form of "AWS Premier Consulting Partner," which only the highest-ranking companies in the AWS cloud utilization field are certified as, and the first "GitHub Enterprise" partnership certification in Japan.

◆ All people

In order to contribute to the customers' sales through their technological capabilities, they try to think flexibly, combining both business and consumer perspectives. This is underpinned by a flat organization and individual discretion. The company is actively hiring creative people who are eager to learn and provide services to as many customers as possible.

◆ Contribution to creative activities

The company's goal is to provide added value that is always needed by our customers and to continue to be a presence that is needed by society. To this end, they will continue to listen to the market, create, disseminate, and improve their own technical information and know-how, and contribute to a wide range of fields, including our customers and the technical community.
