Job Description

[About the Company]

The company constantly wants to create new value and deliver it to the world in the form of businesses and services.

The company (client), the sender of products and services, and the consumer (customer), the recipient, are connected by new interactions and are creating a place for both people to meet each other.

From big choices of life such as going to school, employment, marriage, and residence, to everyday choices such as booking travel, beauty salons, restaurants, etc., users can eliminate various inconveniences and anxiety in their own life. They provide matching services that connect individuals and companies. In addition, by providing various business support services that utilize technology to clients, they are pursuing digitization of business and information (which used to be analog management) and trying to increase industrial productivity.

[Business description]

Management/business promotion of the media and solution business, a unit that integrates domestic and overseas promotional media business, Japanese HR technology and global staffing services.

[About the Job...]

In the Application Infrastructure Group of the cross development organization, you will be responsible for the development of common libraries and frameworks across the various services of the company's group.

The main job is to collect and disseminate information on Java and frameworks through work, contribute to the formulation of development policies, and propose and implement solutions to issues that arise in daily development work.

[Working hours]
