Job Description

----- 【About the company ...】 -----

With a mission to make "reservations" easier and more accessible, Control Technology develops and operates the reservation system "RESERVA" (<https://reserva.be>), which anyone can use free of charge. It supports all types of businesses, regardless of business type or industry. Recently, the company has introduced 320 reservation systems for new corona vaccinations at municipalities and medical institutions nationwide. In addition, due to the change in business conditions in the Corona disaster, the need for reservations has increased, and the system has been introduced to 200,000 companies in Japan, including public offices, major corporations, small and medium-sized enterprises, and sole proprietorships. The greatest benefit is that the company's system automates the reservation reception process, allowing you to focus on the

work you should be doing. In addition, the RESERVA reservation system has a wealth of features that help increase sales and attract customers, such as Zoom integration, advance payment, and mail magazine functionality, making it possible to save labor and improve efficiency.
