Job Description

[About the Company]

The company has created a security camera service that can be easily accessed via Internet. Using video to reduce labor and improve communication. Its use as a content distribution solution that is expanding at various sites, including chain stores and construction sites.

Currently, under the vision of "creating the future from video," they need to acquire data from the video as well as video

distribution.

Therefore, the future of "AI x video data utilization" such as traffic congestion prediction and store visit analysis is being created. A video platform that can be used by any technology and that can be used by anyone from companies to individuals

◎ It is a venture company established in October 2014 ◎

The company developed and provided easy-to-use video services, and in 2017 they achieved the top market share in the cloud camera service industry. Reduce human labor, eliminate human anxiety., generate human time and will continue to pursue smarter cameras.

[Job Description]

[Recruitment Background]

With the vision of "creating the future through video," the company is developing solutions based on a cloud video platform.

Sales organizations specializing in each industry - Business Unit 1 (service and retail industry) and Business Unit 2 (construction, manufacturing, and facilities industry) - will dig deeper into on-site issues, while the Development Division and Planning Division will work together in a "creating" organization to provide high-quality, reasonably priced "video solutions" with a sense of speed. We will realize DX onsite in all industries.

The company is looking for a person to lead product development as a product manager in its "creating" organization, the Planning Division!

[Responsibilities]

Due to business expansion, the company is looking for someone who can plan and design efficient and quality internal business operation tools and software to improve the agency UX to accommodate a rapid increase in the number of clients.

Communicate with the business group in charge of system development and sales (mainly partner sales) to deepen understanding of each group and promote workflow design/system requirements definition, etc.

Define necessary business requirements and determine priorities

[Attractiveness]

In this position, you will be involved in the customer service and operation of Safes, and will be required to plan, design, and improve the operation of business systems while working with all departments to improve the operation of services and business operations. This is a challenging and rewarding job, and at the same time, you will gain multifaceted knowledge that will lead to your own personal growth.

[Working Hour]

Discretionary Work System

[Welfare]

- Full social insurance
- Commuting allowance
- Free drink
- Proximity rent allowance (only for residents within 2 km from the office or within 2 stations)
- Book purchase assistance
- Study session, seminar participation fee assistance
- Multi-department exchange lunch assistance
- Side work is possible

[Holiday]

- Saturday/Sunday/National Holiday
 - Annual Paid Leave
 - New Year Holiday
- etc.

Required Skills

[Required]

Experience in planning and development by understanding internal workflow or outsourced workflow and organizing service/technical requirements

Experience in planning, PM, or product management in the web services, SaaS, or PaaS domain

Experience in business system implementation projects/requirement definition

[Preferred]

*Any of the following experience is welcome!

Former/current engineers with development PM or project lead experience

Experience in service design/operation construction in a business company.

Able to organize complex issues and reduce them to simple system requirements.
Able to manage projects involving various stakeholders.
Able to think from the user's perspective
Have initiative, flexibility, and a sense of speed
Experience in SaaS/PaaS business
Able to understand both technology and services

Company Description
