### Job Description

#### [ABOUT THE COMPANY]

- ★ Leading company in the Fintech area
  - ★ The company has been challenging innovative services one after another in the Fintech area, leveraging its technology and financial know-how. Its core services are the AI lending model, a web platform that uses AI, and the management support platform for small and medium-sized businesses, which is deployed in the corporate lending field in the middle of the fintech area. In the midst of developing and developing rapidly.
- An industry-focused Fintech venture that is also working on new services that are not bound by the industry's common sense. After the service launch of the AI loan model, it became a big topic in the financial industry, and conducted KPO with many

financial institutions, and the company became a well-known entity.

Behind this service's rapid growth in the Fintech space is the high competitive advantage of technology, big data and financial knowledge. There is no unprecedented use of AI in this area, and in order to surpass the conventional credit model, not only will a large amount of data be required, but also it will be necessary to develop original AI algorithms.

For that purpose, financial knowledge, as well as high AI development skills, are indispensable.

This is an initial advantage and a leading advantage that can only be achieved by the company's focus on this area, and it is now an unrivaled advantage.

The company is also rapidly growing its management support platform, launched three years ago.

As of August 2018, 8,000 SMEs and more than 1,300 specialists (professionals) have introduced them.

Managers can easily consult on the web about daily management issues. Normally, consulting with a specialist (professional worker) costs a considerable amount of time to find the best specialist. Due to the "overwhelming sense of speed", the number of users is rapidly increasing.

Through such advanced business development, the company's presence in the fintech area is further strengthened.

[Business description]

-Development of AI loan screening model for financial institutions Development and operation of next-generation CRM tool.

-Development and operation of Big Advance, a financial institution collaboration platform

-Development and operation of an expert consultation platform

## [JOB DESCRIPTION]

### Business

The company's mission is to "bring technology to small and medium-sized businesses."

The company offers "Big Advance," a management support SaaS for small and medium-sized businesses, through more than 80 financial institutions and has been used by more than 70,000 companies.
