Job Description

About the Role:

We are seeking a skilled and experienced Network Engineer to join our dynamic team. This position offers a unique opportunity to work with a variety of networking technologies, contribute to the success of global projects, and advance your career in a supportive and growth-oriented environment.

Client Details

Europe-based Global Multinational IT Company

Description

Responsibilities:

- Provide expert-level network support and troubleshooting for a wide range of network devices and technologies.
- Analyze network performance metrics, identify potential issues, and implement effective solutions to maintain network stability and optimize performance.
- Collaborate with cross-functional teams to design, implement, and manage network infrastructure projects.
- Document network configurations, procedures, and troubleshooting steps to ensure knowledge transfer and maintain consistent practices.
- Effectively communicate technical information to both technical and non-technical audiences, fostering open collaboration and problem-solving.
- Provide exceptional customer support to internal and external clients, addressing their network-related concerns promptly and professionally.

Job Offer

Benefits:

- Competitive salary and benefits package
- Opportunities for professional development and training
- Exposure to cutting-edge networking technologies
- Collaborative and supportive work environment
- Chance to contribute to global projects and make a significant impact

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Abdullah Al Muhsi on +81 3 6832 8983.

Required Skills

Qualifications:

- CCNA or above CISCO Certification
- 3+ years of hands-on experience in network engineering, encompassing a diverse range of network devices and technologies.
- Proven ability to troubleshoot complex network issues, identify root causes, and implement effective resolutions.
- Strong analytic and problem-solving skills, with the ability to analyse complex network data and devise effective solutions.
- Excellent communication and interpersonal skills, enabling effective collaboration with technical and non-technical stakeholders.
- Demonstrated customer service skills, with a proven track record of providing prompt and professional support to clients.

Additional Desirable Skills:

- Prior experience in network support or deployment.
- In-depth knowledge of at least two of the following technical areas: security, network switching, routing, wireless networking.
- Familiarity with network management tools and protocols.
