### Job Description

**[ABOUT THE COMPANY]**

The company is a group of DX professionals specializing in AI utilization.

While its focus is on AI, the company also has business areas of cloud native, UX design, and marketing, and its uniqueness is its ability to provide comprehensive DX support.

From four growth areas, the company supports its customers' DX promotion. By supporting each of these areas independently or by combining them, they have the capability to meet a wide range of needs.

Also, the company can flexibly respond to company-specific issues and unprecedented DX challenges by combining its technologies with each service.

**[JOB DESCRIPTION]**

## &lt;Your Role&gt;

In projects such as building/improving customer websites and planning/improving SNS content, you will be responsible for understanding the customer's business in depth, verbalizing the issues on their website and SNS, and designing UI/UX and implementing front-end programs to solve those issues.

Depending on experience, you will also play a leading role in the creative incorporation of solutions and back-end system implementation.

## &lt;Specifically&gt;

- Front-end development
- Various coordination with backend

## &lt;Development Environment&gt;

Package managers: npm, yarn

Build tools: Gulp, Webpack, npm-scripts, etc.

Languages: Pug, Sass, JavaScript, TypeScript, etc.

Version control: GitLab (, Git), etc.

Frameworks: Next.js (, React, Node, Vue, Angular), etc.

CMS: contentful (, WordPress, MovableType), etc.
