Job Description

An excellent Data Engineer position for a skilled and high calibre candidate, with a unique skillset at a global consultancy firm. Unique and flexible working style, good pay and benefits available!

Client Details

Our client is a Multinational IT Consultancy and Business Solutions Firm, providing their services to top companies globally. They believe innovation and collective knowledge can transform all our futures with greater purpose.

Description

- Communicate with end users to understand their requirements
- Designing the system architecture required for dataflow on cloud infrastructure
- Utilise Snowflake for setting up and programming data pipelines for data ELT
- Building analytical tools to utilise the data pipelines, providing actionable insight into key metrics
- Supervise the complete process from start to finish, and maintain the relevant databases/warehouses
- Be self-directed, requiring minimal supervision while achieving consistent, timely delivery of objectives

Job Offer

- Good salary package available
- Comprehensive benefits included (Health Insurance, Pension, Employment Insurance, etc.)
- Commuting Allowance Offered
- Remote work and hybrid work available
- Flexible time available (*Depending on project and company factors)

To apply online please click the 'Apply' button below. For a confidential discussion about this role please contact Sid Dhingra at +81 3 6832 8928.

Required Skills

- Experience working as a Data Engineer
 - Experience using snowflake is a must
 - Experience working with Cloud Platforms (AWS, Azure), Windows, Unix/Linux
 - Programming Skills in Python, Java or SQL
 - Good understanding of system integration and CI/CD
 - Business level English and Japanese language skills
 - Good problem solving skills, attention to detail
