## Job Description

Optimize software processes as a DevOps engineer for one of the top IT consulting firms in Japan. Work with a globally-known pharmaceutical company and develop your skills in an international environment with multiple career paths.

**Client Details**

Our client is ranked in the top percentile of Fortune Global 500 companies and operates in over 40 countries worldwide. Even throughout COVID-19, our client has still continually grown and has distinguished itself as a provider of the most up-to-date IT solutions, now boasting over 100 locations across the world. It has been consistently recognized as not only one of the undisputed leaders in its field, but also as one of the most innovative companies in the world.

**Description**

- Create, manage, and administer Kubernetes clusters on Docker
- Write YAML files for deployment
- Define CI/CD pipelines using Jenkins or AWS code pipelines
- Ensure DevSecOps practices, create documentation, and coordinate with internal teams to understand requirements and provide technical solutions

## Job Offer

- Chance to be converted to a permanent employee
- An opportunity to work at a global company with multi-national teams
- Property accumulation savings plans and a defined contribution pension plan
- Corporate membership available at various facilities (sports clubs, onsen resorts, hotels, etc.)
