Job Description

[About the company]

The company has created many products to bring happiness to users through "design and technology."
 They will continue to create new value for the world, not only in application development.

■ Examples of In-house Products

- Web Browser
- Design Review Tool
- Online design tools
- Ultra-fast push notification engine
- Data analysis application dedicated to volleyball
- Other in-house products list

■ Examples of jointly developed products

The company has worked on a number of well-known services, including the NHK Kohaku application and the Gurunavi application.

[Job Description]

In mobile app (iOS / Android) development projects, you will be mainly responsible for tasks such as design, implementation and unit testing under the support of the project manager and lead engineer.

You can work with various specialists such as designers, web engineers and testers on mobile application development with a focus on UI/UX.

[Responsibilities]

Design

Programming

Unit testing

Leading the technical aspects of a project

*Depending on your orientation, you may be involved in a variety of tasks, including but not limited to the above, upstream processes, web development and design.

[Recruitment Background]

To strengthen the organisation in line with business expansion

[About the Department]

The department is staffed by PMs and engineers, and depending on the nature of the project, teams are formed with designers and quality personnel.

There are more than 50 application engineers alone, and they are creating an environment where engineers can hone their technical skills, for example by having them carry out evaluations.

An environment for professionals who are committed to technical skills in order to provide the world with as good a service as possible.

Many of the engineers are of a mild and serious temperament.

- Communication within departments and teams

Regular MTGs are held on a project-by-project basis.

There is a TechTeam, a group that meets online and offline for each technical area, where technical information is shared.

The TechTeam takes the lead in organising regular MTGs and tech-related study sessions.

Regular 1-on-1s with the TechTeam for evaluation and learning support

- Others

You can change career to project leader depending on your ability and desire.

[Working conditions]

[Holidays / Vacations]

- 2 days off per week (Saturdays, Sundays, and national holidays)
 - 125 days off per year (Saturdays, Sundays, national holidays, year-end and New Year holidays)
 - Birthday leave: 1 day
 - Paid leave: granted on the day of employment
- ※G/W, summer, and New Year vacations can be combined with paid vacations for long consecutive holidays

[Welfare / Allowance]

- Full social insurance (health insurance, employee pension insurance, unemployment insurance, workers' accident compensation insurance)
- Periodic medical checkups (optional upon request)
- Subsidies for influenza vaccination
- Stress survey for all staff twice a year
- Membership in Kanto IT Software Health Insurance Association
- Celebration and condolence money
- Optional corporate defined contribution pension plan available (additional allowance depending on the amount of contribution)
- All transportation expenses paid
- Remote work allowance
- Support for book purchases, participation in outside seminars, study groups, etc.
 - Several employees participate in overseas conferences such as WWDC, Google IO, and re:Invent every year (all expenses paid by the company).
- Celebration and condolence money
- Optional corporate defined contribution pension plan available (additional allowance depending on the amount of contribution)
- All transportation expenses paid

- Remote work allowance
 - Support for book purchases, participation in outside seminars, study groups, etc.

-

Required Skills

[Required]

A total of 4 years of experience in programming in the following environments.

OS (Swift / Objective-C)

Android (Kotlin / Java)

Flutter

Understanding of iOS / Android features and ability to implement according to OS standard guidelines.

Able to develop while supporting several engineers.

[Preferred]

Experience in development using architectures such as MVVM / Clean Architecture / TCA / DDD

Experience in development using UI frameworks such as SwiftUI / JetPack Compose

Experience in web application development

Experience with cross-platform development such as Flutter / Xamarin / Unity

Experience in leadership roles not limited to engineering

Experience of negotiating with customers

[Ideal Applicants]

Able to communicate appropriately with clients, PMs, designers, etc., and to gain the trust of others

Able to always see things in a positive light and take the initiative to make improvements

Understand the nature of issues and problems and take action to solve them.

Value team development and like to achieve great results through it.
