Job Description

Excellent QE & A Opportunity for **Test Automation** at a well established U.S. Listed Technical Consulting Company. This position offers a great salary package as well as other benefits!

Client Details

Our client is a Multinational IT services company based in the United States, a market leader in providing advanced technical solutions to fulfil their customers' needs and solve their toughest challenges. Integrity, competence and diversity are some of their greatest virtues.

Description

- Lead the development and implementation of comprehensive test strategies to ensure the quality and functionality of applications
- Design and execute cloud testing procedures to validate the scalability and reliability of our cloud-based applications
- Develop automated test scripts using Cucumber and Cypress Automation, enhancing the efficiency of the testing process
- Apply JavaScript programming skills to create and maintain test scripts, improving test coverage and reducing manual testing efforts

- Use Selenium and Selenium Python for web application testing, focusing on automating repetitive tasks and reducing time to market
- Advocate for best practices in quality assurance, including test automation and continuous integration (CI/CD)
- Conduct root cause analysis for production errors and implement strategies to prevent future occurrences

Job Offer

- Competitive salary due to specialist position
- Merit based promotion and growth potential
- Comprehensive benefits included (Health Insurance, Pension, Employment Insurance, etc.)
- Commuting Allowance
- Hybrid Work Style

Required Skills

Basic Requirements:

- Previous experience in use of Cucumber, Cypress, JavaScript, REST/API, Service Testing, Selenium and Selenium Python
 - Previous Experience in QA and Testing
 - Business level English language skills
 - High conversational level Japanese language skills
 - Self starter and eager to learn new technology
 - Good communicator with client and team members
 - Willing to keep up with latest trends and technologies in quality engineering to continuously improve the processes
