Job Description

An excellent IT software development related Project Management position for a skilled and high calibre candidate role at a well-established E-commerce retail company. This position is open for English only speakers!

Client Details

Our client is a leading internet-based services company headquartered in Japan. They have a diverse range of businesses, and with a strong focus on innovation and customer satisfaction they have become leaders in the digital economy by diversifying and expanding their presence internationally.

Description

- Determine and define project scope and objectives for IT software development
- Predict resources needed to reach objectives and manage resources in an effective and efficient manner
- Develop and manage a detailed project schedule and work plan based on priorities provided by product managers
- Break down tasks with an understanding of features and architecture
- Provide project updates on a consistent basis to various stakeholders about strategy, adjustments, and progress
- Utilise industry best practices, techniques, and standards throughout entire project execution
- Monitor progress and make adjustments as needed

- Measure project performance to identify areas for improvement
- Be a role model to the team members when it comes to ownership, proactivity and taking responsibility
- Handle organisational tasks to support the section

Job Offer

- Comprehensive benefits included (Health Insurance, Pension, Employment Insurance, etc.)
- Working Hours: 9:00 - 17:30
- Competitive salary
- Overtime Allowance
- Commuting Allowance
- Merit based promotion system

Required Skills

- Bachelor's Degree (BS) in computer science, engineering, or related field (Masters is welcome)
- Minimum 4 years experience in software development project management
- Business Level English (TOEIC 800~)
- Knowledge of IT systems (Web service system developer preferred)
- Experience seeing projects through the full life cycle
- Experience working directly with software engineers, product managers, and business stakeholders
- Experience in creating technical documents (e.g. API Specifications, DB Relationship Diagram, Architectural Design)
- Strong familiarity with project management software tools, agile methodologies (preferably Scrum and Kanban), and best practices
- Strong familiarity with modern project management software tools, preferably JIRA/Confluence
- Strong analytical and problem-solving skills
- Experience in working in cross-cultural development teams
- Warm personality with excellent communication skills
